Time	4:00 PM – 6:00 PM
Location	Seminar Hall, Department of Information Technology
Student Registration	Approximately 70 seats were made available through a dedicated registration process.
Organized by	Technology Club, NIT Srinagar

1. Event Summary

Tech and Chai 2.0 was an informal technology discussion and networking session organized by the Technology Club, NIT Srinagar. The event provided students with a friendly platform to interact with seniors and mentors, discuss emerging technologies, exchange ideas, and explore opportunities for collaboration and learning.

2. Highlights of the Orientation

The session began with an orientation to the purpose and activities of the Technology Club. Students were introduced to the club's role in promoting technological learning, innovation, collaboration, and practical exposure. The informal format encouraged students to openly share their interests, questions, and ideas related to technology.

3. Student Engagement

Students actively participated in discussions with seniors and mentors. The interaction covered emerging technologies, student projects, learning experiences, and ideas for future technological activities. The networking format allowed students to communicate freely and build connections with other technology enthusiasts. A community group was created during/after the event, giving students a platform to stay connected with mentors, ask questions, and continue seeking guidance and mentorship beyond the session.

4. Main Topics of Discussion

The discussion focused on the impact of Artificial Intelligence (AI) on future jobs and career opportunities, including whether AI may replace certain jobs and how students can adapt to a changing technological landscape. Students actively asked which career pathways they should choose to enter the technology sector. Mentors guided them on the skills, learning paths, and opportunities to explore for building a career in tech. The session also encouraged students to seek guidance from experienced professionals and make informed career choices.

5. Closing

The event concluded with an open exchange of ideas and informal networking among students, seniors, and mentors. The session provided a collaborative environment for students to learn, connect, and discuss their interests in technology. Tech and Chai 2.0 reflected the Technology Club's objective of creating an accessible and engaging space for technological discussion and student interaction.
