

1. Atomic Emission Spectroscopy

2. Stir Casting Furnace

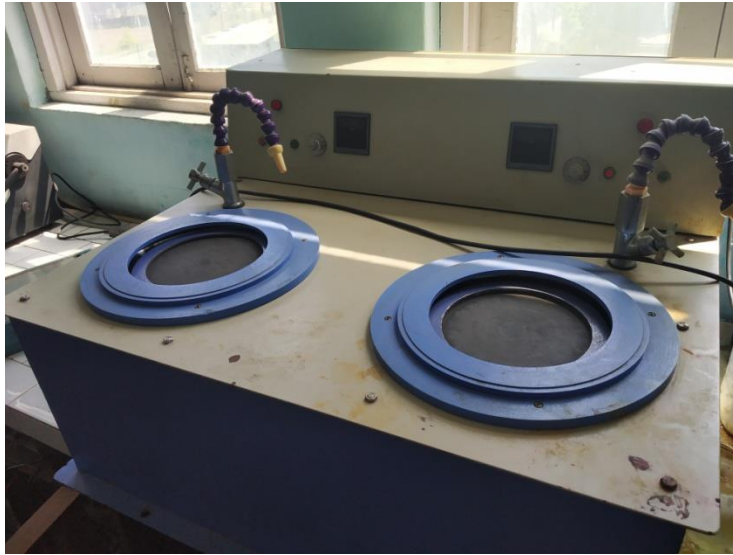

3. Controlled Atmosphere Tubular Furnace (up to 1200 °C)

4. High Temperature Muffle Furnace (up to 1400 °C)

5. Disc polishing machine

6. Optical Microscope

7. Microstructure Image Analysing System

8. PH Meter

9. Bio-logic Potentiostat

10. Cryo Ball Mill

11. Vicker's Hardness Tester

12. Rockwell Hardness Tester

13. Hot Air Oven (up to 450 °C)

14. Ultrasonic Cleaner

15. Digital Weighing Balance

16. Hot Plate with Magnetic Stirrer

17. Spin Coater

18. Centrifuge Machine
